Abstract (en)

[origin: WO2016087748A1] The present invention relates to a press (P) for compactable materials, comprising: - a compacting chamber (16) comprising compacting means (10, 14) along a compacting axis (1) that are intended to compact compactable materials into a block of compacted materials and to position this block at a first location (E1), - means (20, 40) for transferring the block of compacted materials along a transfer axis (2) from the first location to a second location, said transfer axis being transverse to said compacting axis, - means (30) for ejecting the block of compacted materials from the second location and out of said press, along an ejection axis (3) that is separate from the compacting axis and the transfer axis and is transverse to the transfer axis.
