Abstract (en)

[origin: WO2016087907A1] The invention relates to a method for clustering vehicles into traffic streams by means of at least one particle stream calculation model in which the vehicles are regarded as particles forming particle streams representing the traffic streams, the method comprising: clustering a first amount of the vehicles into a first one of the particle streams, the first amount of the vehicles travelling along a first route, and clustering a second amount of the vehicles into a second one of the particle streams, the second amount of the vehicles travelling along a second route being different from the first route at least partially.
