Abstract (en)
[origin: US2017280818A1] Ski boot with rigid shell comprising a lower shell (30) and a cuff (20) articulated in rotation to the lower shell (30), characterized in that it comprises at least a connecting ring (10) connecting the cuff (20) to the lower shell (30), this connecting ring (10) comprising a locking surface (11) collaborating with an opening (31) in the lower shell (30) so as to prevent the connecting ring (10) from rotating relative to the lower shell (30), and a rotation surface (12) collaborating with an opening (24) in the cuff so as to guide the rotation of the cuff (20) relative to the lower shell (30) about this second surface.
