Abstract (en)
[origin: CN107261355A] The invention relates to a harness (10), which includes a waistband (11), a pair of thigh bands (12) and an abdomen hanging point. The abdomen hanging point includes: a connector (14) positioned on the waistband (11), the connector (14) including a connecting ring (15), the connecting ring being assembled rotatably and movably relative to the waistband (11) through a rod (16) of a vertical axis AA, the rod (16) including a first end portion along the rotation axis of the connecting ring (15) and a second end portion opposite to the first end portion; and a first attachment part (17) and a second attachment part (18), which are designed to be connected to an external device, the first attachment part (17) and the second attachment part (18) being along the rotation axis of the connecting ring (15) and being placed on the connector (14) outside the connecting ring (15).
