Abstract (en)  
The present invention relates to a loading system (10) configured to empty a container into a collector (6), comprising at least one lifting system (40) configured to lift a container, a side guard (26) for laterally guarding the lifting system (40), wherein the side guard is provided with a movable part (20, 42), and a guide (48) allowing the movable part (20, 42) of the side guard (26) to move substantially in a vertical direction, wherein the movable part (20, 42) of the side guard (26) can be releasably attached to the loading system (10) at a desired height.
