Abstract (en)
This invention relates to a cable restrictor. The cable restrictor (10, 110) comprises a flexible cable (18) having a first end and a second end, the first end of the cable being connected to a first housing (20), the second end of the cable having a fixing part (24) for insertion into a recess of a second housing. The second housing (22) has locking means (40) including a lock sleeve (54, 154) in the recess (26). The lock sleeve has a locked position and an unlocked position, the lock sleeve in its locked position blocking at least a part of the recess opening. The lock sleeve (54, 154) is rotatable between its locked position and its unlocked position about a lock sleeve rotation axis (A2).
