Abstract (en)
[origin: US2017292775A1] A door tray for a domestic refrigeration appliance includes a base body for holding stored goods and an add-on part being separate from the base body and fastened to the base body. The base body has an upper bracket that is oriented forward and faces away from a rear wall of the base body and a lower bracket that is disposed at a distance therefrom, is oriented forward and faces away from the rear wall of the base body. The add-on part is fastened to the upper bracket and/or to the lower bracket. A domestic refrigeration appliance with a door tray is also provided.
