Abstract (en)
[origin: WO2016091570A1] The invention relates to a suitcase (10) for transporting transport material, comprising a body (12), a lid (14), which is or can be connected to the body (12), and coupling structures (30, 32, 34, 36, 38, 40, 44) on the body (12) and/or on the lid (14), wherein an accommodating space for accommodating transport material is formed between the body (12) and the lid (14) in a closed state in such a way that the accommodating space cannot be accessed from outside, wherein the accommodating space can be accessed from outside in an open state, and wherein the coupling structures (30, 32, 34, 36, 38, 40, 44) are designed in such a way that the suitcase (10) and another suitcase (10λ) having coupling structures (30, 32, 34, 36, 38, 40, 44) can, by means of the coupling structures (30, 32, 34, 36, 38, 40, 44), be selectively stacked one over the other in a displacement-secured manner in such a way that the suitcases can be vertically removed or coupled to each other one over the other in such a way that the suitcases cannot be vertically removed.
