Abstract (en)

[origin: WO2016092049A1] The invention relates to an device for assembling a bottle (21) and an applicator (11), said device being intended to occupy a first position in which the bottle (21) and the applicator (11) are assembled, referred to as the assembled position, and a second position in which the bottle (21) and the applicator (11) are free, referred to as the use position, said device comprising a first part and a second part, said first part comprising a cam (12) and said second part comprising a cam track (22), said cam track (22) being open to enable said cam (12) to leave said cam track (22). The invention also relates to an applicator (11) comprising one of the parts (12, 22) of said assembly device. The invention further relates to an assembly of an applicator (11) and a bottle (21) comprising such assembly device.
