Abstract (en)

[origin: WO2016092107A1] The present invention relates to an oil-in-water emulsion comprising: a) at least one continuous aqueous phase; and b) at least one oil phase dispersed in said aqueous phase and comprising at least one volatile hydrocarbon-based oil; and c) at least one mixture comprising at least one alkyl polyglycoside whose alkyl chain is linear or branched and comprises from 12 to 22 carbon atoms and at least one linear or branched fatty alcohol, having from 12 to 22 carbon atoms; d) at least one associative nonionic polyether polyurethane; e) at least one deodorant active agent. The present invention also relates to a method for the treatment of body odor and optionally of human perspiration, which consists in applying to a keratin material an emulsion as defined previously.
