Abstract (en)
[origin: WO2016091818A1] The invention relates to a case for accommodating tools or small parts, comprising a main body, a lid hinged to pivot on the main body and a receptacle secured on an inner side of the lid for documents and/or small parts, wherein the inner side of the lid is provided with a plurality of first securing devices which are designed to match second securing devices on the receptacle, wherein the first and second securing devices are designed and arranged such that the receptacle can be fixed in at least two different positions on the inner side of the lid.
