Abstract (en)

[origin: WO2016092044A1] The invention relates to an absorbent medium for improving the printability, especially by inkjet printing, of a security element, in particular an optically variable security element, said absorbent medium comprising a binder, at least one pigment, and an especially aqueous solvent. The invention further relates to a transfer film comprising an absorbent layer made of said type of absorbent medium as well as to a method for personalizing a security element using said type of transfer film.
