Abstract (en)

[origin: WO2016091733A1] The invention relates to a method for producing liquid compositions that have a yield point and contain one or more surfactants, in which a basic formulation comprising at least one surfactant and at least one solvent is produced in a batch process in a first step, and this basic formulation is differentiated in a continuous method in a subsequent second step. The invention also relates to the compositions obtained in this manner.
