Abstract (en)

[origin: WO2016091585A1] The invention relates to a door (6, 7) for a domestic refrigeration appliance (1), having a panel-like door body (12) which has a door shelf device (17) which has two vertically oriented door struts (19, 20) arranged on an inner side (11) of the door body (12), and at least one door shelf (13, 14, 15, 18) extending between the door struts (19, 20), wherein at least one door strut (19, 20) has, on an inner wall (21, 22) facing the door shelf (13, 14, 15, 18), a height adjustment device (16) for adjusting the height of the door shelf (13, 14, 15, 18) in discrete height steps, wherein the height adjustment device (16) has a plurality of supporting brackets (23), which are formed one above another in the vertical direction, are arranged spaced apart from one another in the vertical direction and extend in the direction of the opposite door strut (19, 20) in a manner raised from the inner wall (21, 22), for supporting a door shelf (13, 14, 15, 18), wherein the height steps are formed by the supporting brackets (23). The invention also relates to a domestic refrigeration appliance (1) having a door (6, 7).
