Abstract (en)
[origin: WO2016091251A1] The invention relates to a wall bushing (1) for establishing contact between a plug connector and a housing wall or the like. In this case, the wall bushing (1) can be placed and fastened over an opening by means of three fastening bores (6). Advantageous arrangement of the three fastening bores (6) ensures that the wall bushing (1) is fitted on the housing in a particularly safe and stable manner. The special, inventive shaping of the wall bushing (1) additionally allows a high mounting density of a large number of wall bushings (1) in a small area.
