Abstract (en)
A multi-drum washing machine drainage control method, the multi-drum washing machine at least comprising a first washing drum (1) and a second washing drum (2); the method comprising: when the first washing drum (1) reaches a drainage process, determining whether the second washing drum (2) is draining; if yes, then the first washing drum (1) waits for the second washing drum (2) to finish draining before starting to drain; and if not, then determining whether the first washing drum (1) waits for the second washing drum (2) to finish draining before starting to drain. Alternatively, when the first washing drum (1) reaches the drainage process, determining whether the second washing drum (2) is draining or dehydrating; if yes, then the first washing drum (1) waits for the second washing drum (2) to finish draining before starting to drain; and if not, then determining whether the first washing drum (1) waits for the second washing drum (2) to finish draining before starting to drain.
