Abstract (en)
[origin: WO2016097187A1] The invention relates a security element for a secure document, in particular a security element in the form of a security thread, the security element comprising on one surface (5) thereof at least one optical structure (1), preferably non-planar, wherein this method involves the step of continuously treating said element so that the hydrophobicity of said surface is increased, the treatment comprising the application of a composition to said surface (5), the composition comprising one or more hydrophobic compounds.
