Abstract (en)
[origin: WO2016096433A1] The present invention relates to a continuous track (2) for a tracked vehicle (1), in particular for a snow track (1), comprising a plurality of individual tracks (20) which are continuous, arranged in parallel to each other and interspaced in the transverse direction (Y), the individual tracks (20) being at least partly connected to each other in the transverse direction (Y) by means of grouser (25), and each individual track (20) being closed by at least one connecting element (3) to give a continuous structure. The continuous track (2) is characterized in that the connecting element (3) is arranged below a grouser (25) and connected to said grouser (25).
