Abstract (en)

[origin: WO2016096829A1] The invention relates to a method for operating a safety system, comprising a control unit (2), a bus (3), a plurality of bus nodes (41-49) which are connected to the control unit (2) via the bus (3), and a plurality of subscribers (61a-63a, 74a, 75, 76, 87, 88, 89) which are connected to the control unit (2) via a bus node (41-49), wherein at least one subscriber is designed as a temporary subscriber (89). The method comprises the following step, namely the temporary subscriber (89) is logged off the safety system, wherein a separation of the temporary subscriber (89) from the safety system is announced by a manipulation, and the temporary subscriber (89) is separated from the safety system. A further aspect of the invention relates to a safety system for an elevator system (1) for carrying out the method and to an elevator system (1) having said safety system.
