Abstract (en)
[origin: WO2016096614A1] The present invention relates to fabric care compositions and softener formulations with clear, transparent optical qualities and a viscous consistency, comprising a combination of specific ester quats with at least one non-ionic or cationic thickener and at least one aminosiloxane, and to the use of these fabric care compositions and softener formulations. The invention further relates to the use of a combination of specific ester quats with at least one non-ionic or cationic thickener and at least one aminosiloxane for producing the stated fabric care compositions and softener formulations.
