Abstract (en)
[origin: WO2016095970A1] The invention relates to a laundry drying apparatus, in particular a dryer or washer-dryer, wherein the laundry drying apparatus comprises a cabinet and a laundry storing compartment arranged within the cabinet. An air channel (20) is arranged within the cabinet and adapted to guide drying air (A) from at least one air outlet of the laundry storing compartment. A filter system (52) arranged within the air channel (20) downstream the laundry storing compartment comprises a first lint filter (54) and a second lint filter (56). A filter wet cleaning unit (70) has a nozzle (72) for supply liquid for washing the first filter (54), wherein the nozzle (72) is arranged to direct the liquid flowing out of the nozzle (72) towards the front surface (64) of the first filter (54).
