Abstract (en)

[origin: WO2016097971A1] Hook (10) suitable for fixing a sink or other similar article to a base plane, said hook (10) comprising a first element (12) and a second element (14), said first element (12) being connectable to the base plane and movably fixable to the second element (14) to be coupled to the sink, at least one through opening (19) being obtained in a portion of the sink, the second element (14) comprising a plate (32) which comprises first coupling means (48) and to which a strap (44) with a free end (58) is united, which end is movable in respect to said plate (32), said strap (44) comprising second coupling means (46), said first coupling means (48) and said second coupling means (46) being connectable to each other so as to lock the free end (58) of the strap (44) to the first coupling means (48) and form a closed ring consisting of the plate (32) and the strap (44) so that the sink is locked to the second element (14) when the first coupling means (48) or the strap (44) pass through the through opening (19) and the strap (44) is locked to the first coupling means (48).
