Abstract (en)  
[origin: WO2016096925A1] The present invention relates to a connection device (1) for connecting two light strip profiles (20, 30) of a strip lighting fixture, comprising at least one first through hole (7) and a second through hole (8), wherein a structured surface (9) is provided at least at the second through hole (8), which surface is suitable for cooperating with a screw (25) during connection of two light strip profiles (20, 30) in such a way that a force is generated which drives the two light strip profiles (20, 30) toward one another. The invention also relates to a light strip profile (20) comprising at least one connection device according to the invention, wherein the connection device (1) is arranged in a starting position. The invention further relates to a strip lighting fixture comprising at least one light strip profile (20) according to the invention.
