Abstract (en)

[origin: WO2016096708A1] The present invention relates to a device carrier (10) for a strip-lighting luminaire, comprising: first lines (14) for forming a first power supply circuit; second lines (14) for forming a second power supply circuit; and at least one converter unit (12) for electrically coupling the first to the second power supply circuit, said converter unit being mounted on the device carrier (10). The first lines (14) are arranged on a rear face of the device carrier (10) so that the first lines (14) are concealed by the device carrier (10) in the mounted state of the strip-lighting luminaire. The invention further relates to a strip-lighting luminaire comprising at least one device carrier (10) according to the invention.
