Abstract (en)
[origin: WO2016097321A1] The invention relates to a luminaire, in particular a luminaire for humid rooms, comprising a connection element for establishing an electrical connection to an electrical grid, a line element for performing current and/or signal transmission, and a lighting element for generating light in a main direction of radiation of the luminous flux generated by the lighting element for a vision job. In order to simplify mounting and be able to make client-specific adjustments to different lighting situations, a specially designed integral interface is provided.
