Abstract (en)
[origin: CA3008530A1] The invention relates to a pyrotechnic article (10) having at least one first receiving part (11) for a pyrotechnical effect (20), and at least one ignition means (40) connected to the pyrotechnical effect (20). Furthermore, at least one auxiliary ignition system (30) is provided which can be ignited by the ignition means (40), wherein an ignition flame (31) can be generated by means of the auxiliary ignition system (30) and the ignition flame (31) can be guided out of the pyrotechnic article (10) in particular in a substantially horizontal direction, as a result of which at least one additional pyrotechnic article which is spaced apart from the first pyrotechnic article and has a pyrotechnical effect can be ignited.
