Abstract (en)
[origin: WO2016096891A1] An improved contact for disconnecter is disclosed in the present invention. The improved contact comprises one or more contact fingers and at least one U-bracket. A first section of a at least one first section of the U-bracket is isolated with a first section of at least one first contact finger of the one or more contact fingers. Also, a first section of a at least one second section of the U-bracket is isolated with a first section of at least one second contact finger of the one or more contact fingers.
