Abstract (en)

[origin: CA2967081A1] In a plug connector comprising two plug parts which can be detachably plugged one into the other and which have front housing parts (100, 200) which are matched to one another and also electrical contact elements (120, 220) which are matched to one another, wherein the two front housing parts (100, 200) overlap in mutually facing regions (225) in the plugged-together state, provision is made, in particular, for the two front housing parts (100, 200) to seal off the plug connection, which is produced when the two plug parts are plugged together, to the outside by means of a sealing lip (125) which is arranged on the one front housing part (100) and also by means of an annular groove (230) which is arranged on the respective other front housing part (200) and which is surrounded on the inside by sealing surfaces (235, 235') which run around in the manner of a ring and on the outside by a collar (225) which runs around in the manner of a ring.
