Abstract (en)

[origin: WO2016096487A1] The invention relates to a method for producing a spark-plug electrode (10), wherein the spark-plug electrode has a main body (15), wherein the main body (15) is produced by separation from a wire, wherein the wire has a core (17) and a sheath (18) that surrounds the core (17), and the core (17) extends over the entire length of the main body (15), wherein a plurality of main bodies (15) can be produced from the wire.
