Abstract (en)

[origin: WO2016097150A1] The invention relates to a group communication system (GKS) comprising at least two communication devices (K1-K6), in particular three, four, five or six communication devices (K1-K6) which communicate in a wireless network (FNW) operating according to a short range radio standard; primarily voice communication between a group of people takes place via the wireless network, each person in the group of people carrying a communication device.
