Abstract (en)

[origin: WO2016097844A1] The invention relates to a system and to a method for informing visitors of a facility, which is public and/or is accessible to a group of visitors authorized for access, by using personal mobile telephones of the visitors having at least one data interface to receive and forward the information to the visitor in question, wherein a docking device in the region of the visited facility, which docking device initially requests the entry of a daily access code by means of the mobile phone for the purpose of activation after a data channel to the personal mobile telephone has been opened, which access code becomes visible on a display device located in the visited facility only after the visited facility has been entered and must be entered on the mobile phone, and does not transmit the desired audio data and possibly other information to the mobile telephone of the visitor in question until after the activation has occurred.
