Abstract (en)
[origin: CN107303011A] The invention relates to a device for applying a glue track (6) to a covering strip (1) of a rod-shaped product of the tobacco processing industry. The device has a nozzle (2) immobilized relative to the covering strip (1) during coating of the glue track (6), a roller (4) rotatably driven by a driving device is arranged between the covering strip (1) and an outlet opening (3) of the nozzle (2), glue is coated on the roller, the roller directly coats the covering strip (1) with glue in the form of a glue track (6), a scraper (7) pointing to the roller (4) is arranged between the nozzle (2) and the covering strip (1) along a rotation direction of the roller (4), and the scraper has an interval relative to the roller (4).
