Abstract (en)

The object of the invention is a reinforced concrete slab, in particular a floor slab, characterised in that it is a prefabricate unit and that it has a supporting reinforcement in the form of at least one longitudinally arranged steel truss, and an additional reinforcement, wherein the height of the concrete flange of the slab is between 15 and 80 mm, and the width of the concrete flange of the slab is between 15 and 80 cm. The invention also comprises a floor system.
