Abstract (en)

[origin: WO2016105302A1] The invention relates to a water closet seat which comprises a material with low heat transmission coefficient and the surface of which gives a warm feeling when contacted by the users, and to the production method for said water closet seat. Thanks to the method developed within the scope of the invention, the water closet seats will be produced in a manner to have low heat transmission and thereby, the users will get a warm feeling from the surfaces without the use of any heater or heating apparatus.
