Abstract (en)
[origin: WO2016102252A1] The invention relates to a hand-held tool (20), in particular a nail-setting device, comprising a handle (120) for manual actuation of the hand-held tool (20), an interface for fastening the hand-held tool (20) to a remote actuation device, a control apparatus for controlling the hand-held tool (20) in a manual mode and in a remote actuation mode, and a querying apparatus for querying whether the hand-held tool (20) is fastened to a remote actuation device, wherein the control apparatus controls the hand-held tool in the manual mode if the querying apparatus detects that the hand-held tool (20) is not fastened to a remote actuation device, and wherein the control apparatus controls the hand-held tool (20) in the remote actuation mode if the querying apparatus detects that the hand-held tool (20) is fastened to a remote actuation device.
