Abstract (en)

[origin: WO2016102617A1] The invention relates to a seating device, in particular an airplane passenger seating device, comprising a seat base unit (14a; 14b) which comprises at least one base body (18a; 18b) which forms a seating area (16a; 16b). According to the invention, the base body (18a, 18b) comprises, at least in a front area (26a, 26b), at least two sub areas (32a, 34a; 32b, 34b) which are separated from each other in a transverse direction (30a, 30b), the height of said sub areas being movable with respect to each other.
