Abstract (en)
[origin: WO2016102011A1] The invention concerns a method for washing laundry in a laundry washing machine comprising an automatic dosing device (58) which supplies detergent in a plurality of washing cycles. The method comprises a water loading phase through a sequence of partial loads of water into the washing tub (3) and a step of introducing a quantity of detergent into the washing tub (3) from the automatic dosing (58) device only after it has been determined that the laundry is saturated, or substantially saturated.
