Abstract (en)  
[origin: WO2016102346A1] The invention relates to a pontoon bridge (1), which comprises a plurality of pontoons (12) for supporting a bridge support (13) and comprises a stabilizing structure (2) having two supporting cables (3), the anchoring points (4) of each supporting cable being anchored to opposite banks (5) of a body of water and being arranged below a water surface (6), wherein at least one supporting cable (3) has an approximately parabolic course in relation to the bridge support (13) in a plan view and the supporting cables (3) being connected to each other by means of connecting cables (7, 70). At least one supporting cable (3) is connected to a buoyant body (8) by means of at least one supporting element (9), and the buoyant body (8) is arranged at least partially above the water surface (6).
