Abstract (en)
[origin: WO2016105296A1] The application concerns a self-powered faucet generating electric power with a dynamo (1) having a rotor (2) disposed in the flow of water being provided by the faucet. The faucet comprises a temperature sensor (4) and a flow sensor which allow measuring the temperature and flow rate of the water emitted. The temperature, the current flow rate and the cumulated total flow rate can be indicated to the user via a LED-indicator (6).
