Abstract (en)

The invention relates to a rescue control system for an elevator, which said elevator comprises an elevator motor (1) and a first brake (10) and a second brake (20) for braking the elevator motor (1). The rescue control system comprises a mechanical brake lever (11) connected to the first brake (10) with a mechanical wire (12) for controlling the first brake (1); and an electrical brake control unit (21) connected to the second brake (20) for controlling the second brake (20).
