Abstract (en)
[origin: WO2016124871A1] The invention relates to a piece of outside furniture (40) comprising: a hollow space (405) closed by a door (410); a means (415) for locking the door in position when said door is closed; a transmitter-receiver (430) of an electromagnetic wave, the locking means being designed to unlock the position of the door when an electromagnetic wave received from a radio frequency identification tag having received an emitted electromagnetic wave comprises pre-determined information; and a through-opening (420), said opening being designed to allow the passage of a post planted in the ground.
