Abstract (en)  
[origin: WO2016107770A1] Proposed is a transportation means, a user interface and a method for operating a user interface (1) for a transportation means. The method comprises the steps of: - defining a screen background graphic (11) for a display device (2) of the transportation means, - automatically detecting a situation in which a predefined region (12) of the wallpaper (11) has been covered by an item of foreground content (13, 14, 15, 16), and, in response thereto, - automatically repositioning the wallpaper (11) in relation to the foreground content (13, 14, 15, 16) for preventing the region (12) from being covered by the foreground content (13, 14, 15, 16).
