Abstract (en)

[origin: WO2016107999A1] System (100) for managing data relating to devices (1), this system comprising a central data platform (4) for the interconnection of a plurality of communication boxes (5), each communication box interconnecting a plurality of devices (1) disposed locally in a predefined physical environment; and being configured so as to upload to the central data platform (4) data associated with said plurality of devices; a mega-data analytic module (13) configured to analyse the data recorded in the central data platform (4) so as to generate correlations, tendencies, and/or predictions; an interface (8) according to a service architecture oriented mode for making the analysis results available.
