Abstract (en)
The invention provides a radiant panel element (1) comprising a first panel (2) and a tubing (4), which comprises at least one circuit (4a), and wherein heat transfer medium flow. The tubing (4) is fastened to the first panel (2) with heat conducting adhesive (7). The radiant panel element (1) comprises also a second panel (3), which is arranged parallel to the first panel (2) so that the tubing (4) is arranged between the first and the second panel (2, 3). The tubing (4) is fastened also to the second panel (3) with heat conducting adhesive (7).
