Abstract (en)

[origin: WO2016110508A1] This invention relates to a dispensing head (16) for a cosmetic product, comprising a mechanism for actuation and dispensing (30) the product, said actuating mechanism comprising: - a coupling part (42) to a member (14) for dispensing the product mounted on a receptacle (12), - a product dispensing duct (44), carried by the coupling part (42); - a maneuvering lever (46), rotatably mounted around a pivot axis (47), with the maneuvering lever able to displace the coupling part (42) along an actuating axis (24) between a rest position and a product dispensing position. The dispensing head comprises a mechanism (34) for blocking the maneuvering lever, said blocking mechanism able to be displaced by the user between a immobilization configuration of the lever and released configuration of the lever.
