Abstract (en)

[origin: WO2016110435A1] A module (1) forming a thermal bridge breaker for breaking a thermal bridge able to form at the junction between an internal floor slab and a floor slab, comprising an insulating material (4), bar-shaped reinforcements (5), an assembly forming a tube (6), being equipped with at least one first profile section of which the ends are provided with a plate (14), the assembly constituted by said first profile section and the plates forming a beam (15); characterised in that one of the plates (14) is in contact with said front wall (6a) of the element forming a tube (6); and in that it comprises at least one second profile section (20) having a vertical sheet extending entirely through said assembly forming a tube (6), said vertical sheet being extended at each of its ends by a horizontal planar portion (22, 23) protruding from said assembly forming a tube (6).
