Abstract (en)  
[origin: WO2017194440A1] The invention relates to a cylinder (10) comprising a cylindrical body (11). It is provided here that a first proportion of the circumferential face (48) of the cylindrical body (11) is of porous and gas-permeable configuration, and a second proportion of the circumferential face (48) of the cylindrical body (11) is of gas-impermeable configuration, wherein the porous gas-permeable first proportion of the circumferential face (48) is connected to at least one gas feed line, and wherein the first proportion of the circumferential face (48) is at least 0.1% and at most 50%. Further aspects of the invention relate to a corresponding adapter sleeve (10) and a corresponding printing forme cylinder.
