Abstract (en)
[origin: EP3243998A1] An industrial door comprises a sheet (10), a plurality of horizontal sheet tensioning elements (12) distributed on the surface of the sheet, and a structure for supporting and moving the sheet (5; 105; 1005). Such structure comprises two vertical support uprights (20), a towing carriage (14; 114) sliding along each vertical support upright (20), and a plurality of towed carriages (15; 115) sliding along each vertical upright support. Each towing carriage and each towed carriage are provided with sheet connection means (16; 116) suitable for connecting to one respective end of a respective horizontal sheet tensioning element. Each sheet tensioning element consists of a tie-rod (12).
