Abstract (en)
[origin: CA2965876A1] The invention relates to a seating furniture chassis (100), comprising a height-adjustable seat surface (101), a driving means (105), a shaft, a height adjustment mechanism (103), and a threaded rod (104), wherein the driving means (105) is coupled to the shaft and is designed to transmit a torque to the threaded rod (104) by means of the shaft, and wherein the height adjustment mechanism (103) is coupled to the threaded rod (104) and to the seat surface (101) in such a way that rotation of the threaded rod (104) is converted into a height adjustment of the seat surface (101) by means of the height adjustment mechanism (103), wherein a longitudinal axis of the shaft is not arranged parallel to a longitudinal axis of the threaded rod (104).
