Abstract (en)
[origin: WO2016113466A1] The invention relates to a road-legal construction machine (1), which comprises a carriage (3) supported by wheels provided with tyres (2), and a cabin (4) provided with a steering wheel and having its inside laterally extending over the top surface of the tyres (2). The cabin (4) has a first cross-sectional area (A) in the horizontal direction at a first distance from the bottom (6) of the cabin (4) between the wheels, and a second cross-sectional area (B) in the horizontal direction at a second distance from the bottom at the same level as or above the top surface (2a) of the tyre (2). The bottom (6) of the cabin (4) has a mounting (5, 18) allowing the rotation of the cabin (4) and for mounting to the carriage (3), and the first cross-sectional area (A) of the cabin (4) is smaller than the second cross-sectional area (B). The invention also relates to a cabin provided with a steering wheel.
